JOURNAL OF RESEARCH of the National Bureau of Standards—A. Physics and Chemistry
Vol. 73A, No. 6, November–December 1969

INDEX TO VOLUME 73A

January to December 1969

A

Absolute isotopic abundance ratio and atomic weight of terrestrial rubidium 511
Absolute ratio 511
Acidic dissociation 299
Acidity 37, 299
Adams, N. K., Jr., Brinckman, F. E., Kokoszka, G. F., The effects of low energy irradiation on organometallics. Organometal halides of group IVA 201
Aging blemishes 79
Analysis of methane-hydrogen mixtures 281
Åkermanite 69
Aneroid calorimeter 221
Anisotropy 321
Archival records 79
Argon 207
Armstrong, G. T., Churney, K. L., The heat of combustion of beryllium in fluorine 281
Asymmetric, linear, and symmetric top molecules 233
Atomic energy levels in W I 277
Atomic theory 173
Atomic weight 511

B

β and T corrections 125
BaB_8O_{13} 615
"B" rotational constants 233
Bates, R. G., Robinson, R. A., Paabo, M., Deuterium isotope effect on the dissociation of weak acids in water and deuterium oxide 299
–, *Staples, B. R.*, Two new standards for the pH scale 37
Beers, Y., Lojko, M. S., A table of rotational constants of symmetric top molecules giving rise to microwave spectra 233
Bekkedahl, N., Weeks, J. J., Heats of reaction of natural rubber with sulfur 221
Beryllium fluoride 281
Beryllium metal 281
Beryllium nitride 471
Bessel functions 611
Blemishes 79
Boron-10 195
Boron-11 195
Botter, R., Rosenstock, H. M., Franck-Condon factors for the ionization of H_2O and D_2O 313
Brillouin scattering 593
Brinckman, F. E., Kokoszka, G. F., Adams, N. K., Jr., The effects of low energy irradiation on organometallics. Organometal halides of group IVA 201
Bullough, R., Simmons, J. A., deWit, R., Fundamental aspects of dislocation theory, a conference report with abstracts 517

C

Calculation of diffusion coefficients in ternary systems from diaphragm cell experiments 43
Calculated line strengths 51
Calculated line strength for the transition array $(3d^3 + 3d^24s) - 3d^24p$ in Ti II 51
Calculus of variations 611
Calorimeter 221
Capillary depression 611
Capillary depressions for nearly planar menisci 611
Carbonate 37
Caspi, E., Shadmi, Y., Oreg, J., Effective interactions in the even configurations of the third spectra of the iron group 173
Catanzaro, E. J., Murphy, T. J., Garner, E. L., Shields, W. R., Absolute isotopic abundance ratio and atomic weight of terrestrial rubidium 511
Chemical potential 563
Chlorides 621
Chromium oxide 431
Churney, K. L., Armstrong, G. T., The heat of combustion of beryllium in fluorine 281
Citrate 37
Classical path 405
Classical path methods 389
Classical path methods in line broadening I. The classical path approximation 389
Classical path methods in line broadening II. Application to the Lyman series of hydrogen 405
Classified lines of W I 277
CO_2 563
Coexistence 1
Coherent Bose gas 309
Color photography 113
Color representation of electron microprobe area-scan images by a color separation process 113
Combustion calorimetry 281
Compressed liquid 15, 25
Configuration interaction 51
Configurations $3d^3$, $3d^24s$, $3d^24p$ 51
Configurations $3d^34p$ 125
Configurations $(3d+4s)^n4p$ 497
Configurations $3d^n4p - 3d^{n-1}4s4p$ 159
Configurations $3d^n4d$ in singly ionized atomes of the iron group 125
Configurations $3d^n4p - 3d^{n-1}4s4p$ in Sc II, Ti II, and V II 159
Configuration $(3d+4s)^n4p$ in neutral atoms of calcium, scandium, and titanium 479
Conversion of existing calorimetrical[ly] determined thermodynamic properties to the basis of the International Practical Temperature Scale of 1968 451
Cooper, J., Smith, E. W., Vidal, C. R., Classical path methods in line broadening I. The classical path approximation 389
–, –, –, Classical path methods in line broadening II. Application to the Lyman series of hydrogen 405
Cooper, M. J., Vortex motions in ideal Bose superfluid 309
Copper 599
Coriell, S. R., Hardy, S. C., Morphological stability of a cylinder 65
Corliss, C. H., New even levels and classified lines in the first spectrum of tungsten (W I) 277
Critical opalescence 593
Critical phenomena 593
Critical point 487 585
Critical point parameters 563
Critical region 563
Crystal chemistry 69
Crystal growth 69
Crystal structure 621
Crystallographic orientation 321
Crystallography and preparation of some $ABCl_3$ compounds 621
Cupric silicate 69
Cylinder 65

D

D_2O 313
de Groot, J., McMurdie, H. F., Morris, M., Swanson, H. E., Crystallography and preparation of some $ABCl_3$ compounds 621
Density fluctuations in fluids 593
Deuterium isotope effect 299
Deuterium isotope effect on the dissociation of weak acids in water and deuterium oxide 299
deWit, R., Simmons, J. A., Bullough, R., Fundamental aspects of dislocation theory, a conference report with abstracts 517
Diaphragm cell 43
Diffusion coefficient 207
Diffusion coefficients 43
Dimethoxyborane 195
Dislocation theory 517
Dissociation 213
Dissociation constants 299
Distorted tetrahedra in strontium copper åkermanite 69
Drop calorimetry 471, 479
Double chlorides 621
Douglas, T. B., Conversion of existing calorimetrically determined thermodynamic properties to the basis of the International Practical Temperature Scale of 1968 451
–, *Payne, W. H.*, Measured enthalpy and derived thermodynamic properties of alpha beryllium nitride, Be_3N_2, from 273 to 1200 K 471
–, –, Measured enthalpy and derived thermodynamic properties of solid and liquid lithium tetrafluoroberyllate, Li_2BeF_4, from 273 to 900 K 479
Dynamical model for Brillouin scattering near the critical point of a fluid 593

E

Effective interactions in the even configurations of the third spectra of the iron group 173
Effects of low energy irradiation on organometallics. Organometal halides of group IVA 201
EMF 37
Energy levels 125, 159, 333, 479, 599
Energy levels of Fe^{+++} ions in Al_2O_3 241
Energy levels, wave functions, dipole and quadropole transitions of Fe^{+++} ions in sapphire 241
Energy parameters 333
